DID YOU KNOW ABOUT BALTICS?

- Cooperation with Baltic companies enables to access the EU structural funds (only in Lithuania up to 1 billion EUR for the period of 2014-2020).
- Region offers highly qualified talent pool as well as astonishing tax environment for R&D activities.
- Gross salaries in the life sciences sector are 2 to 3 times more competitive compared to Western Europe.
- A growing number of start-ups and SMEs have advanced product portfolio and would like to attract partners for the financial investments.
- High quality *clinical trials* at reasonable cost in a wide range of therapeutic areas (a wide choice of advanced laboratories provide high quality tests meeting European Union requirements).
