

Mr. Andrius Kubilius,
Prime Minister of the Republic of Lithuania,
Official Patron of the International Conference
Life Sciences Baltics 2012

Dear Guests,

It is my honor to personally invite you to the first **Life Sciences Baltics 2012 conference**, which will be held in **Vilnius, Lithuania, on September the 12-14th, 2012**. The event will present the significant potential of life sciences industries in the Baltic states – Estonia, Latvia, Lithuania, and will foster cooperation with global leaders in the field. Located at a geographically strategic junction, the Baltic States are on the fast track of becoming Northern Europe's Life Sciences Hub.

Lithuania has an outstanding growth potential in the life sciences sector and offers exciting investment and cooperation opportunities. Over 80 percent of the locally produced biotech and pharmaceutical production and services are exported to more than 70 countries. The Lithuanian Government has set a primary goal of promoting the life sciences industry.

An international exhibition, visits to leading companies, and a B2B partnership event will be held in parallel with the conference, which will provide an excellent opportunity for exhibitors and visitors to meet major stakeholders in the industry and associated manufacturers and service providers operating in the Baltic States.

We believe that the event will help establish a unique platform for effective business-science partnership in the field of life sciences.

Regards,

Andrius Kubilius,
Prime Minister of the Republic of Lithuania
