### Project description:

The project aims at developing further the skills especially for SMEs to exploit the potential of information and communication technologies to optimize transport and logistics operations. The projects focus is on all levels of potential B2B co-operations and includes extensions to B2C.

### Objectives:

The project will act as enabler for the set up and the successful operation of logistic and transport services optimising:

- logistic procedures of all layers (up to 3 PL and 4PL )
- reverse logistics and eCommerce
- electronic commerce B2B and B2C

### Expected outcomes:

The project will enable collaboration to avoid inefficient business processes in logistics and procurement. At the end of the project the SMEs should be able to interoperate electronically with their business partners on a local and an European level.
